Branding options

Fast UK delivery

Our tension fabric light box displays are an ideal solution for stunning, vibrant edge-lit displays. Featuring easily interchangeable tension fabric graphics and high quality designed and manufactured aluminium framing, these can be supplied in a range of standard sizes or can be custom manufactured to suit your exact requirements.

Tension fabric light box display systems are ideal for wall-mounted, freestanding or hanging applications and are perfect for window displays, retail, architectural, exhibition displays and stands, showroom and reception areas or any public space.

Why we recommend XG's Lightbox Displays

- Unique easy installation features
- Warranted LED lighting and drivers
- Low running costs
- Digital dye sublimation high quality print
- Edge-lit LED system
- Real value for money and low cost of ownership with interchangeable graphics
- Replacement graphics available

LED Lightbox Display Information:

On the next pages you will find a guide to ordering your Lightbox Display which we hope helps you decide what you need.
Please call us on **01280 707180** or if you have any questions or to discuss your requirements.

Type:

Freestanding LED Lightbox Displays

Freestanding lightboxes have additional feet allowing them to stand safely and can also be anchored down as required. Using silicone edge graphics (SEG) you can easily switch between single and double-sided applications.

- Lightweight 100mm Profile Aluminium Extrusion
- High quality interchangeable TFS graphics
- Energy efficient edge lit LED illumination
- Choose from single or double-sided options
- Range of sizes up to 2.5m high

Wall-Mounted LED Lightbox Displays

Wall-mounted tension fabric lightboxes use silicone edge tension graphics (SEG) to give a seamless edge to edge finish. Ideal for exhibitions, retail or commercial environments. Single-sided application only.

- Lightweight 100mm Profile Aluminium Extrusion
- High quality interchangeable TFS graphics
- Energy efficient edge lit LED illumination
- Single-sided application
- Range of sizes up to 2.5m high

Aluminium Extrusion & LED Lights

100mm deep Aluminium Profile:

A 100mm deep aluminium extrusion is ideal for LED lightboxes due to its robust construction, providing ample space to house and conceal the LED lighting system while ensuring structural integrity, even illumination, and a sleek profile for a visually appealing and durable display solution.

Edge lit LED Technology:

Edge-lit LED technology is ideal for LED lightboxes, as it enables a slim design, even illumination, and a modern aesthetic by directing light from the edges of the display, creating a visually captivating and uniform glow that enhances the impact of the fabric graphics.

Tension Fabric:

What is TFS?

TFS stands for Tension Fabric System, also known as SEG (Silicone Edge Graphics).

Tension Fabric Systems are an ideal solution for retail, commercial, architectural, exhibition and display environments. Systems can be tailored to your requirements using re-configurable frame components and are easy to install, dismantle and transport often requiring no or few tools for assembly.

The graphics are a printed fabric finished with a silicone edge, sewn neatly around the edges fit in to a recessed groove within the frame that then stretches the graphic across the display. The result gives you a smooth and high-quality finish that brings your graphic to life. Wall mounted, freestanding, hanging systems are available along with light boxes and we offer a range of fabric options including frontlit, backlit and blackout.

Creating your artwork

You have 2 options when creating artwork

1. Design your own or use your preferred agency to design it for you.

We have templates for many of our products which can be found on the 'TEMPLATES' tab section of the relevant product page. We recommend using file transfer sites to upload artwork due to the speed and ease. One of these that we recommend is **WeTransfer**

2. Let XG assist you with your artwork.

If you require assistance in preparing your artwork, we can help lay out your supplied elements.

We will require you to complete our artwork brief which can be found on the 'ARTWORK' tab section of the relevant product page. This will then need to be sent to us via email to sales@xg-group.co.uk you can send a photo or a scanned version, we would also require any logos in vector format (ai,eps), fonts and relevant copy needed to complete the layout.

This process would require your approval and final sign off before production. Please note, we do charge for artwork and we will discuss this during the quote process.

General guides for artwork are as follows:

- Production ready high resolution PDF
- Supply your artwork at full size or for larger prints supply your PDF at half or quarter size.
- Supply your PDF file with Image Bleed
- Resolution to be a maximum 150 dpi at full size
- Embed all text and fonts
- Transfer your files Via We Transfer
- Should you require more complex graphic design, please call us on **01280 707180** or email **sales@xg-group.co.uk** to discuss your requirement.

How to order

Now you are ready to place your order:

You can contact us by emailing **sales@xg-group.co.uk** with your requirements along with your full invoice address and delivery address (if different). We will then send you back a formal quotation prior to your order confirmation.

For non account customers we will require full payment before your order can be processed.

Payment can be made by card over the phone, by bank transfer or cheque (please allow 4/5 days for cheques to clear).

Delivery is based on a standard 5-7 working day production lead time. These may vary depending on quantities and are subject to availability. If an express turnaround is required, we will always endeavour to help.

Please call us on **01280 707 180** if you need help or advice on our products or processes.
